Questions and Answers for IT Services Request for Proposals

Updated as of February 4, 2019

1. Can you tell me how many desktop and/or laptop computers would be under management with this contract?

   Yes. Please find the listing where you found this list of questions and answers.

2. From the RFP, I understand there is one physical server that is virtualized to support multiple functions. Can you tell me how many virtual servers this physical system hosts?

   The Lenovo ThinkSystem SR650 server hosts three servers virtually, as described below:
   One is our main server for files, printing, active directory, dhcp, and dns
   Two is for backup active directory and dns
   Three is for our accounting software file share, a server for connection to the State of Missouri - Office of Administration for payroll information, and for Veeam backup software

3. Do you have a current inventory document of your equipment including: quantities, models, operating systems, firewall, content filtering?

   Yes. Please find the listing where you found this list of questions and answers. This list should not be considered all-inclusive as there could be other pieces of equipment that we would like to be maintained under this contract.
